WEATHER RESISTANCE FAST-FOOD STALL

CREATIVE MINDS

Small fast food vendors face challenges during bad weather.

Challenges:

- Rain reduces customer traffic
- Customers have nowhere comfortable to sit
- Vendors struggle to continue operating
- Bad weather leads to loss of income

➤ THE PROBLEM

RESEARCH

RESEARCH METHODS

- Interviews
- Questionnaires
- Observation

FEEDBACK FROM INTERVIEWEES

Participants:

Jabulile Mgwenya

‘When it rains, customers disappear and I lose almost all my sales for the day. I can’t afford to close.’

Lorraine Maphenga

“I need something quick to set up that protects both my food and my customers. This would help me stay open.

Hopewell Mnisi

’It helps us as vendors to have a shelter so that the products will be kept fresh and insures there is no losses during rainy days’

AFFINITY MAP THEMES

Themes Identified:

1. Business Challenges
2. Customer Comfort
3. Weather Impact
4. Business Sustainability
5. Customer Experience

KEY INSIGHTS

Small fast food business owners need reliable security and affordable supplies because they want to operate smoothly and provide fresh food, but safety risks and transport difficulties create operational pressure.

Small fast food vendors want to maintain sales and continue serving customers during bad weather because their businesses depend on daily income, but limited protection from rain and harsh weather disrupts operations and discourages customers from buying food.

Customers are attracted to fast food businesses that are affordable, conveniently located, and provide quick service because they want accessible and satisfying meals, but strong competition makes customer retention difficult.

HOW MIGHT WE STATEMENT

Weather-Resistant Stall

FOLDABLE FOOD STALL

Your Fast, Professional & Portable Business Solution

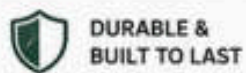

STEP 1: SET UP STALL

STEP 2: STALL READY

STEP 3: CUSTOMER EXPERIENCE

SOLUTION IDEA

Features

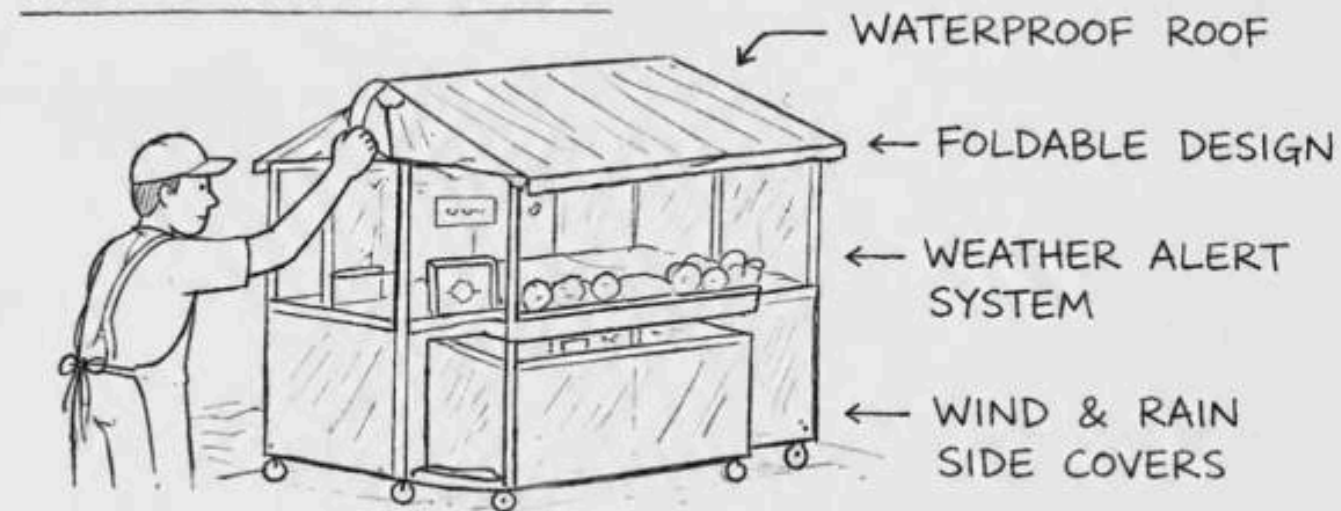

- Foldable design
- Waterproof roof
- Weather-resistant side panels
- Protected customer seating
- Built-in energy converter
- Backup battery system

Benefits

- Operates during rain
- Operates during load shedding
- Supports electronic payments
- Improves customer comfort

STEP 1: UNFOLD STALL

Vendor unfolds protective roof

STEP 2: WEATHER-RESISTANT STALL READY

Transparent side covers protect against wind and rain.

STEP 3: CUSTOMERS EAT COMFORTABLY

- ☒ Vendor continues selling during rain
- ☒ Customers eat comfortably

LOW-FIDELITY PROTOTYPE

Description:

A hand-drawn storyboard showing:

- Vendor receives weather alert
- Stall is unfolded
- Protective canopy is installed
- Customers eat comfortably
- Vendor continues selling during rain.

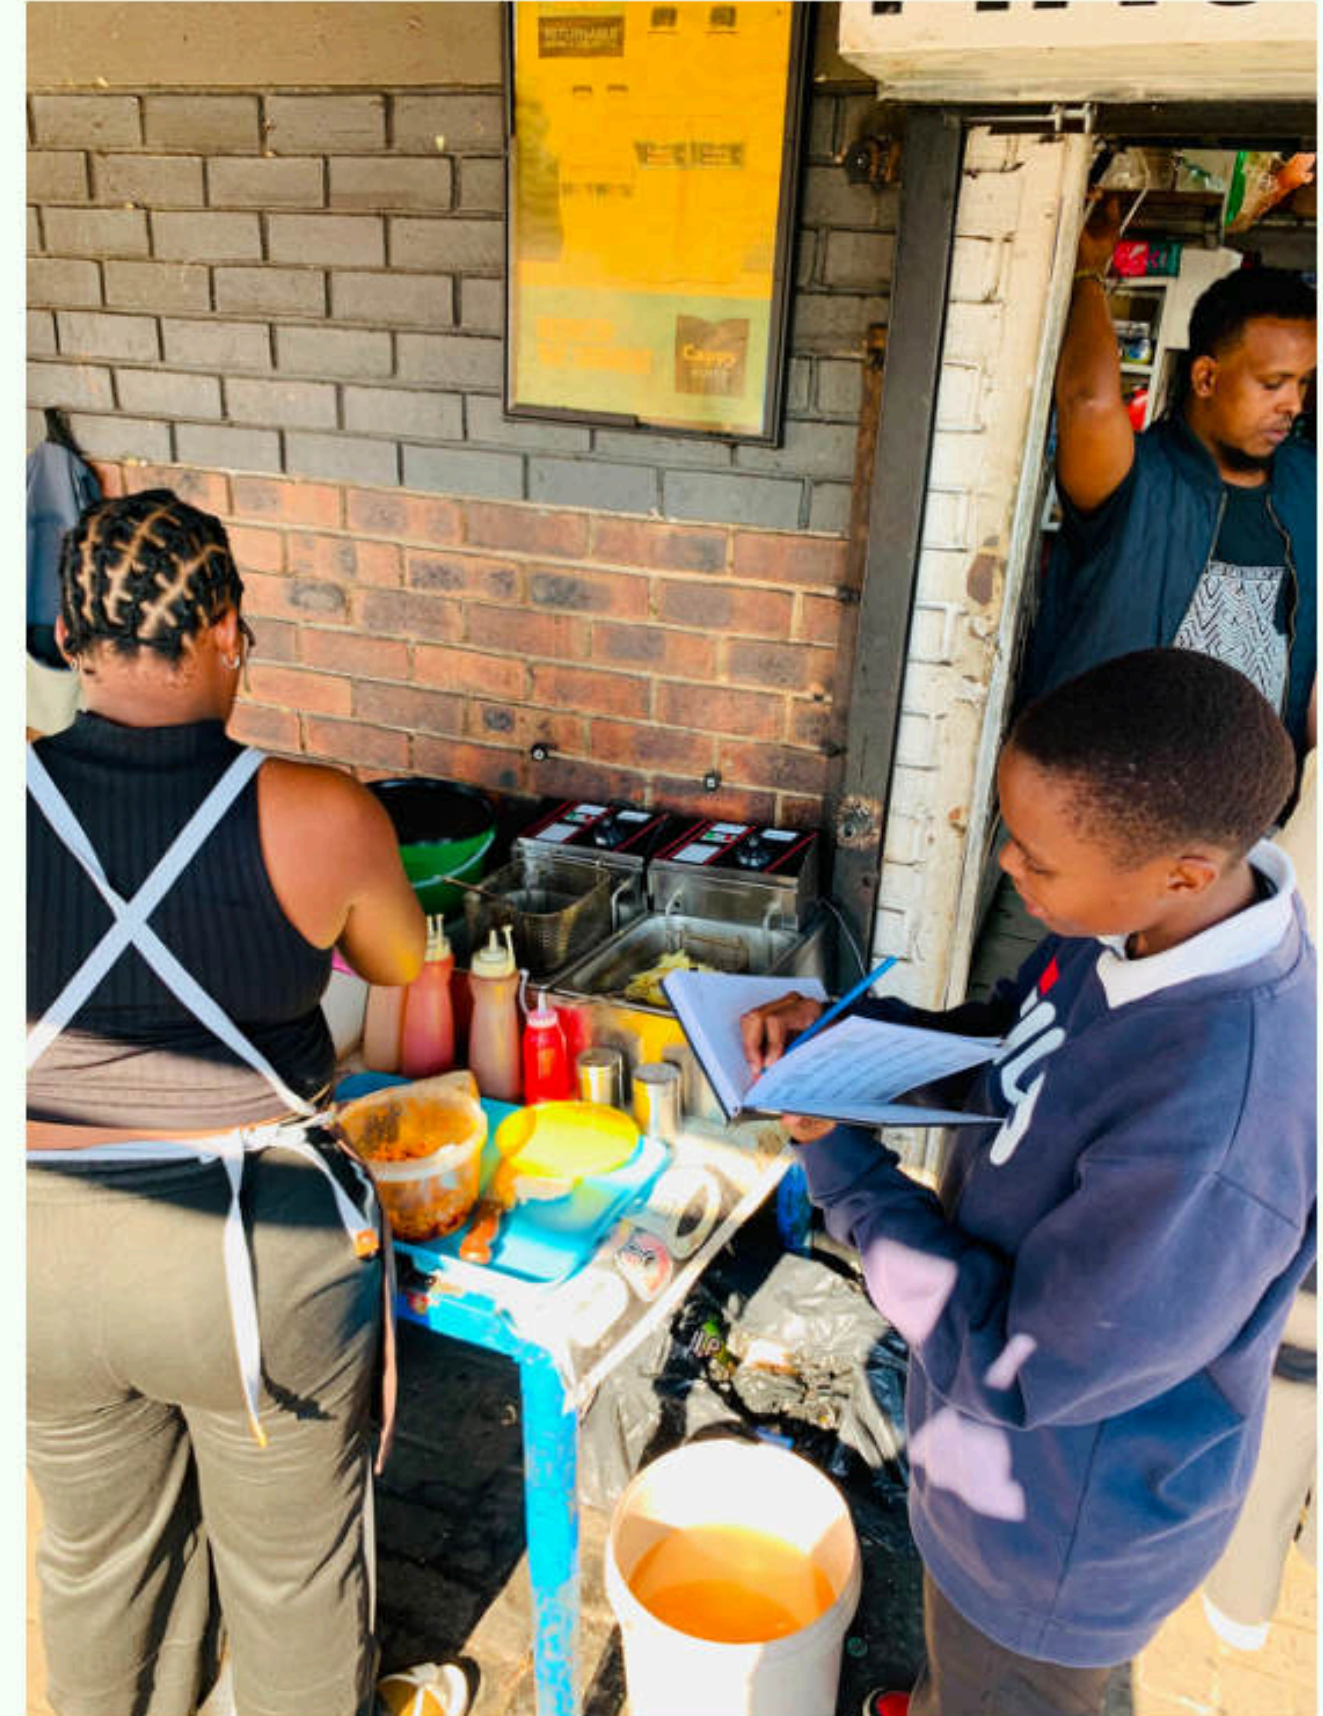

TESTING GOAL-LOW FIDELITY

Positive

- Easy to understand
- Useful during rain

Negative

- Setup may take time
- Limited seating space
- Storage concerns

MID-FIDELITY

MID-FIDELITY PROTOTYPE
DESCRIPTION:
A MORE DETAILED WIREFRAME
SHOWING:

Testing Goal:

Does the solution make sense and work well for users?

Questions:

- Is the setup process easy to understand?
- Would vendors use this stall?
- Is the seating area comfortable?
- What changes would improve the design?

Feedback Received

"Need power during load shedding"

"Improve mobility"

"Better protection for equipment"

Changes Made

"Added energy converter"

"Added backup battery"

"Improved portability"

ENHANCED PROTOTYPE FEATURES
